

PARTNERSHIP OPPORTUNITIES

The health and developmental problems facing our children today, like ADHD, Asthma, Allergies and Sensory Processing Disorders, are overwhelming to families and educators and solving these problems requires engagement from all sectors of society.

Epidemic Answers partners with companies that believe in our mission and have similar values, and understand that corporations can play a vital role in driving positive change and progress for our kids. Our partners contribute more than money; they often contribute ideas, in-kind support and social influence.

The vision of Epidemic Answers is to create a world where parents and professionals have the essential knowledge, resources, and support to raise healthy and vibrant children in the modern world. We believe that it will take education, outreach, innovative research and creative cultural strategies to see this change through. Partnering with us enables health-centered organizations to benefit from our active network of like-minded grassroots followers. If this sounds good to you, let's team up and get kids healthy again!

OUR MISSION

Our mission is to generate and share essential knowledge, inspire innovation, and build community in order to prevent and reverse children's chronic health and developmental conditions so they may thrive in the today's world.

OUR WHY

**54% OF AMERICAN CHILDREN HAVE A DIAGNOSED CHRONIC CONDITION.
WE ARE NOT OKAY WITH THIS.**

WE BELIEVE OUR KIDS CAN GET BETTER AND AIM TO PROVE IT SCIENTIFICALLY.

At age 5, Kyle had numerous debilitating diagnoses including: ADHD, asthma, Sensory Processing Disorder and life-threatening food allergies. Through integrative medicine and a holistic lifestyle, Kyle has shed all of his labels. Instead of a life filled with medicines and doctor visits, Kyle is a thriving 12-year old with a fully functioning mind. He makes straight A's, has lots of friends, and creates amazing art. Kyle is healed! Read Kyle's Story [HERE](#)

Until 2nd grade, George had been an excellent student. Then, mysteriously and suddenly, George developed a host of troubling symptoms. He was diagnosed with dysgraphia (an inability to write coherently), anxiety, depression, obsessive compulsive disorder, and oppositional defiant disorder. He completely lost his math skills. Eventually, he could not even attend class. Doctors shrugged their shoulders. They simply couldn't help alleviate George's many symptoms. Thankfully, his parents took his healing into their own hands with diet and lifestyle changes. And that has made all the difference. Read more about George [HERE](#)

At a 3 year old well visit, Ben's pediatrician diagnosed him with Pervasive Development Disorder, an autism spectrum disorder. His mother was told, "You have to find a way to wrap your head around this. A kid like him, if we are lucky, he might one day be a janitor." Within 5 years, Ben healed his underlying medical conditions, caught up developmentally and began to thrive. Ben is now diagnosis-free, and killing it in middle school. Read Ben's story [HERE](#)

"When you tell a person that there's no hope; that their child will always be this way; that there is nothing they can do about it; that's not science: that's a misuse of statistics."

— Dr. Martha Herbert, PhD, MD Pediatric Neurologist and Neuroscientist, Principal Investigator Epidemic Answers' Documenting Hope Research Program

KEY ACCOMPLISHMENTS

- Best-selling book on a critically under-resourced area of modern chronic illness in children: PANS/PANDAS and Autoimmune Encephalitis (Brain Under Attack)

-

RESEARCH ACCOMPLISHMENTS

- **Documenting Hope** is a special research project of Epidemic Answers, featuring two IRB-approved studies
- Enrolled >1800 parents in the IRB-approved CHIRP™ Study (Child Health Inventory for Resilience and Prevention); Currently analyzing data to better understand the role of environmental stressors and triggers in children's health
- Enrolled firsts participants in the IRB-approved cornerstone longitudinal research study, the FLIGHT™ Study (Facilitated Longitudinal Intensive Investigation of Genuine Health Transformation) which examines how chronic conditions can be reversed in children
- Presented Poster on the CHIRP™ Study at Institute of Functional Medicine International Conference 2020, 2021
- Several research papers in development
- Dissemination of research findings to public through media campaign

Dear Friends,
If it weren't for the Documenting Hope Project,
my life would be very different today. Please
support this project so that others can feel
better and live life to the fullest. All kids
deserve a chance to live a happy and healthy
life. Please help and support us any way you can!
