Innovations in Regenerative Healing: *Speaker Bios*

CHRISTIAN DRAPEAU

Christian Drapeau is a scientist, author, medicinal plant expert, and pioneer in the field of stem cell research. He holds a graduate degree in Neurophysiology and has been involved in medical research for 30+ years, with the last 20 specifically dedicated to stem cells. He pioneered the understanding that stem cells constitute the body's natural healing and repair system, and has traveled the world in search of the most powerful plants that support stem cell function and enhance the body's regenerative potential. Having lectured in 50+ countries and written 5 books - including the best-selling *Cracking the Stem Cell Code* - as well as dozens of published scientific papers on brain research and Endogenous Stem Cell Mobilization, Drapeau is known by scientists, physicians, and biohackers alike as an expert and pioneer of his field. A scientific advisor to many companies, he is currently the Founder and Chief Science Officer at STEMREGEN, where he developed the most potent natural stem cell supplement.

DR. NAVAZ HABIB

Dr. Navaz Habib is a Doctor of Chiropractic, certified in functional medicine, functional range conditioning, and acupuncture. Using a functional medicine approach, he helps people uncover and address health vulnerabilities that negatively affect their energy, focus, and productivity. Dr. Navaz Habib is the bestselling author of 'Upgrade Your Vagus Nerve,' and the founder of 'Health Upgraded,' an online functional health consulting clinic supporting optimal health by elevating the awareness and function of the Vagus nerve.

He is also the host of 'The Health Upgrade Podcast'. Dr. Habib graduated as valedictorian from Canadian Memorial Chiropractic College in 2010 and went on to practice traditional chiropractic for years, until he utilized the power of functional medicine to transform his own health.

DR. TODD OVOKAITYS

Dr. Todd Ovokaitys, a Johns Hopkins-trained Medical Doctor (MD), Author, and Researcher, spearheads groundbreaking work at the forefront of regenerative medicine. Beyond his medical mastery, he leads the way as a published author and researcher, creating a transformative approach that enriches the scientific and medical community at large.

With Dr. Todd's state-of-the-art invention of the Strachan-Ovokaitys Node Generator (SONG) Laser Technology, he is revolutionizing healing possibilities through cutting-edge research on Very Small Embryonic-Like stem cells (VSELs).

A recognized medical pioneer, Dr. Todd skillfully integrates the latest advancements with traditional medical practices. His passion and prowess for the arts deepen his scientific approach, as demonstrated by his contributions to music, including composing symphonies, chorale, and instrumental pieces, as well as dance choreography, instruction, and performance. Dr. Todd's multidisciplinary perspective sets him apart, making him a true pioneer in his field and a beacon in the science community.
